Auction date: September 10th, 2011

Item List

This list is provided for your convenience, it is **not the order of sale**. Items will be sold in random order. Possibly after 1 PM on day of sale we will take requests for remaining items that you are interested in. Condition of the merchandise ranges from new/restored to fair and poor. Many just need a good cleaning. Bulk tube lots are “as found” and have **not been picked over**. You are strongly urged to inspect the goods; all sales are **as-is where-is with no guarantees stated or implied**. Unless the catalog indicates that the item is working or has been tested, the items have not been checked. Some vacuum tubes have been tested where explicitly indicated. Announcements on day of sale take precedence over this list. Please see the notes at the end of this listing.

There may some last minute items added after this list goes to press. If so an addendum will be available day of sale.

Payment is by cash or good check with proper ID, sorry no credit cards. A 5% buyers premium is charged. New Jersey sales tax will be collected unless valid dealer resale information is provided. Goods must be removed day of sale unless other arrangements have been made.

Additional items may be available. Please check our website www.njarc.org for latest information. Printed copies of the final auction list will be available on the day of the sale.

Notes:

1. Tube testers used to verify tubes where noted were Hickok 539A Mutual Conductance for most tubes and a Raytronic Cathode Ray Beamer model CB-54 Mutual Conductance tester for CRT types.
2. Older tubes may have dirty or corroded pins that should be cleaned or burnished before use.
3. Some of the HAM equipment came directly from a SK shack and is presumed working but time did not allow testing unless so noted.

For any late-breaking information and additions to this auction catalog (if any) please check the New Jersey Antique Radio Club website www.njarc.org
